THE COMPLETE SOLUTION

Our Values

Superior customer service, innovation, quality and commitment. Uncompromising integrity guides our work every day. Our team continues to deliver on the promise, producing best results in unprecedented times.

This century promises to deliver pioneering technology and newer products and services to sell. We are innovation-ready for future opportunities and diversify our business and brands to excel in all markets.

We continue to build a corporate culture that respects and values the unique strengths and cultural differences of our associates, customers and communities.

Our Vision

Our vision is to be known for reliability, responsiveness, innovative products and services and to become our customers' preferred supplier for leading brands. Our goal is to be the leader in every market we serve.

OVERCOME DOUBT USE REMANUFACTURED CARTRIDGES

Remanufactured cartridges are printer cartridges professionally recycled or manufactured based on the original manufacturer's design. Using remanufactured printer cartridges does not void your printer warranty.

Remanufactured printer cartridges are an excellent way to save money, generate attractive printouts and potentially protect the environment. These cartridges perform like new ones but with a lower cost and reduced environmental impact. When remanufactured by reputable companies like; MSE, IBM and NCR; exercising good quality control, remanufactured toner

cartridges will perform as well as, or better than, new cartridges.

Globally well-known brands MSE, IBM and NCR guarantee that the quality of their remanufactured toner cartridges will match or exceed that of an original equipment manufacturer (OEM).

Toner cartridges that Chip Qatar Solution markets are manufactured at ISO certified factories and have STMC (Standard Test Methods Committee) certification. STMC is a global committee formed to find and promote standardized test methods for the printer cartridge industry. STMC certification guarantees the cartridge will work at the

same specifications as the original manufacturer and are 100% remanufactured each and every time.

Remanufactured toner cartridges will not damage the printer. Printer damage resulting from a defective toner cartridge is rare and usually very minor. A properly remanufactured cartridge is no more likely to cause damage to a machine than a new cartridge.

A high-quality remanufactured cartridge should produce output that is essentially indistinguishable from a new cartridge with the same life.

Remanufactured cartridges are significantly less expensive than original equipment

manufacturer's cartridges. Remanufactured cartridges cost 30% to 60% less on a per copy basis than OEM cartridges.

By using remanufactured cartridges, you help to reduce these environmental impacts. The typical used toner cartridge weighs about 3 pounds and is composed of 40% plastic, 40% metal and smaller percentages of rubber, paper, foam, and toner. The plastic is made of engineering-grade polymers and takes at least 1,000 years to decompose. However, approximately 97% of these combined components can be recycled and reused.

CHIP QATAR SOLUTION GUARANTEE

- OEM standard quality and reliability with no leakage
- Extended manufacturer warranty cover for your printer
- Significantly cheaper than OEM cartridges.
- 98% success rate for reliability, which is higher than OEM cartridges
- Extended yield on some cartridges
